Report 83-6, 33pp., September 1983.

ABSTRACT

In 1982 relevant government agencies including Federal, Provincial and University Libraries in the City of Winnipeg were searched for vegetation studies of the Province of Manitoba. Topics of documented studies are divided into seven categories. The first category provides a listing of topics for the Manitoba region in general. The following six categories provide a listing of topics based on ecological subregions of the province from the High Subarctic to the Mid-Boreal Temperate. Individual topics are alphabetically listed in each category and a legend for reference location is provided for each listing.
